TIME STOPS.

Materials for this route: 6 to 8 photos of one watch. Generate them in Google Flow or Whisk, or use your own product photos. Claude writes the image prompts. Editing, color, light, text and sound are code. Check your rights to use the photos, fonts and sound.

Pull the crown and time stops. A watch ad where you change the dial and strap with a cut.

STILL is a made-up watch brand, invented for this reel. It suits any product you can photograph.

EVERY CUT GOES THROUGH THE PRODUCT

A set of pictures isn’t a reel. Here the dial of one shot lands exactly on the dial of the next, and only the angle changes.

0-2 s	Macro of the crown: “Pull the crown.” Then “TIME stopped.”, a lime seconds hand and a small stopped timer.
2-4 s	White dial on a tan strap: “STILL chronograph.”
4-8 s	“YOUR dial.”: a wipe turns white to black. “YOUR strap.”: black alligator, chocolate suede, navy NATO, oyster steel.
8-13 s	Close-up and three-quarter view. A light strip passes over. “12.4 MM PROFILE.”
13-16 s	A cut through a water drop, splashes: “TIME goes on.”
16-20 s	Macro of the dial, then the watch fades down: “Make it yours.” and the name.

> **Look:** black backgrounds, steel, one lime accent on the seconds hand. Anton with Bodoni Moda italic, Geist Mono for small type. Slow camera moves, no shake.

CLAUDE CODE

```
Help me make a watch concept ad from this guide. STILL is a made-up watch
brand.

First write me image prompts for 6 to 8 photos of one and the same
chronograph on black: crown macro, white dial on tan leather, black dial
on chocolate suede, navy NATO strap, steel bracelet, three-quarter view,
side profile, in water. I will generate them and send the files. Tell me
if a photo doesn't match the others. Match the watch angle and dial
centre across every cut. This kit includes neither these photos nor the
Anton, Bodoni Moda and Geist Mono font files: bring licensed files or
agree on replacements with me.

Make a 20-second vertical reel. "Pull the crown." "TIME stopped." with a
lime seconds hand and a stopped timer. "STILL chronograph." "YOUR dial."
with a wipe recoloring the dial. "YOUR strap." changing black alligator,
chocolate suede, navy NATO, oyster steel. Close-ups and a light strip.
"12.4 MM PROFILE." A cut through a water drop: "TIME goes on." End on
"Make it yours." and the name.

Transitions go through the product: align the dial circle of one shot
exactly with the next. Anton with Bodoni Moda italic. Text with no blur
or shake, no camera shake. Write sound in code: ticks, a click on the
crown, music with hits.

Show a full storyboard of real frames first and wait for my yes.
```

Useful changes to ask for

“Do this for [my product] with these photos.”

“Keep the dial in the same place in every cut, even when the angle changes.”

WHAT TO LOOK AT

- One watch: generated photos often change the hands or the case. Ask Claude to reject those that don’t match.
- Dial cuts: if the circles don’t line up, it reads as a slideshow.
- Colors: acid colors look wrong on a watch. Use muted ones, with one accent.
- Bright studio: looks like a toy. Keep it dark, with light on the edges.
- Specs: 12.4 mm is made up for this brand. For a real product, use its real numbers.
- Sound and motion: Claude can’t hear or watch video. Check them yourself.

> **How the original was made:** it used separate textures and masks for each strap and dial, not 6 to 8 full photos. The photo route in this guide is an alternative, so your result will differ. The original differs from what this guide will give you. Your reel will differ from the original.
